

# 5NINES COLOCATION

## COLOCATE YOUR IT INFRASTRUCTURE WITH 5NINES WORLD-CLASS, CARRIER-NEUTRAL AND REDUNDANT DATA CENTER IN WISCONSIN

5NINES colocation services provide mission-critical data storage and security with 99.999% infrastructure uptime guarantee. Because of our unique physical location, we are able to serve south-central, south-eastern and northern of Wisconsin. Located just two hours north of Chicago and one hour west of Milwaukee, 5NINES is the perfect colocation spot. There is no need to worry about costs and fees. We will design your colocation service based on your needs.

### BENEFITS OF 5NINES COLOCATION

#### COST

Colocation can save you considerable money. It allows you to secure your data without having to buy or build your own data center, hiring a team, or a number of related expenses. We provide the space, experts, security, redundancy and pay the electric bill.

#### SCALABILITY

Scaling your hardware up or down is easy with Colocation. Space limitations and network capacity won't be an issue. 5NINES can help customize a set up that will evolve with your needs.

#### PHYSICAL SECURITY

Your data is your most critical asset. Keeping it safe requires the full-time attention of a team of experts and a carefully designed physical environment. 5NINES' purpose-built data center has every modern security measure in place including biometric readers, key cards access and building physical security.

#### DISASTER PROTECTION

Colocation offers additional layers of protection from physical incidents or outages that could result in lost data. In order to ensure your hardware is functioning optimally we have redundant power sources and cooling systems in place to cut potential downtime.
